

# Acupuncture & Herbs for Women's Health

**ACUPUNCTURE & HERBS CAN EFFECTIVELY TREAT A NUMBER OF COMMON WOMEN'S HEALTH ISSUES.**

Acupuncture is a natural, holistic therapy that not only treats pain but also addresses the underlying cause. Most menstrual illnesses are caused by an imbalance, deficiency or stagnation of blood and/or Qi (vital

energy) in organs including the liver, kidney, and spleen.

Acupuncture and herbal medicine balances and tonifies blood and Qi to achieve a healthy, pain free menstrual cycle. Oriental Medicine also helps you conceive and deliver a healthy baby at full term.

- PMS
- Menstrual Pain
- Fertility
- Breast Pain
- Menopause
- Morning Sickness
- Sexual Dysfunction
- Facial Rejuvenation
- Weight Loss
